Setting new standards.

Why MityBilt?

Indoor Air Quality

All MityBilt tables conform to the most stringent indoor air quality standards by exceeding the obligations for the **GREENGUARD Gold** environmental requirements. Visit **www.mitybilt.com/environment**

Table Edge Treatment

MityBilt includes a premium 3mm vinyl bonded edge-band on all tables and desks, which has superseded the T-Mold edge as the previous standard table edge treatment for schools. Advantages include: permanently bonded to the substrate of the table; provides a sealed edge which does not allow the ingress of bacteria or dampness; high security (cannot be picked off like T-Mold); allows radius corners in consideration for “Safe For Schools”.

Limited Lifetime Warranty

MityBilt is known for best-in-class educational furniture and has built a reputation of engineered products that exceed consumer expectations for quality and durability. For your peace of mind, MityBilt offers a limited lifetime warranty on all products. Visit **www.mitybilt.com/warranty**

MityBilt Standards

The exacting standards and features that have become the trademark of the MityBilt table range include: exceeding the **100,000 Cycles** quality test; rubber cushioned, steel, non-removable, adjustable floor glides; metal inert gas welded frames and leg assemblies; powder-coat paint finish to all surfaces - no VOCs (Volatile Organic Compounds) or heavy metal finishes; “Safe For Schools” radius table corners.
